## Profile

Full-stack developer with 3+ years of freelance and internship experience shipping production web applications in React, Next.js, TypeScript, and Node.js. Delivered 8+ client projects end to end, from Figma handoff to deployment, and built enterprise product features during a six-month internship at Space IT Labs. Holds a BSc (Hons) in Information Technology (University of Jaffna), with hands-on Docker, AWS, and GCP experience, seeking an Associate/Junior Software Engineer role.

## Education

**University of Jaffna** 2022 - 2026
BSc (Hons.) in Information Technology

- Relevant coursework: Data Structures & Algorithms, Object-Oriented Programming (Java), Databases, Networking

## Experience

**Space IT Labs** February 2026 - August 2026
*Full-Stack Developer (Internship)*

- Shipped 4 production features on Seamless Source, a PRM SaaS platform: Critical Path timeline and DPP Editor
- Built the initial prototype of a cross-platform robotic arm application for school children, including the interactive 3D interface and the mobile build pipeline
- Wrote unit and integration tests for new features and participated in Agile sprint ceremonies and code reviews

**Mathru.lk** March 2025 - April 2026
*Frontend Developer (Freelance)*

- Built and maintained user-facing features for a production healthcare EHR platform using React and TypeScript
- Developed responsive, accessible UI components with shadcn/ui, keeping the interface consistent across the product
- Collaborated with a fully remote team in Agile sprints, using Git-based workflows and peer code reviews to keep the codebase maintainable

**Dynamic Biz IT Solutions** November 2022 - December 2025
*Full-Stack Developer (Freelance)*

- Developed and launched 8+ client web applications, including 6 built with React/Next.js, owning each project from requirements to deployment
- Translated complex Figma designs into responsive, pixel-perfect user interfaces using Tailwind CSS
- Deployed and maintained client sites on Vercel and Cloudflare

## Research

**Final-Year Research Project**
*A Decision Framework for Log Aggregation Strategy Selection in High-Duplication Kubernetes Workloads*

- Comparative study of three logging pipeline configurations (baseline, Fluent Bit Lua filtering, and OpenSearch upsert) evaluated across synthetic Kubernetes workloads

## Projects

**RestroHQ** Source Code

- All-in-one SaaS for restaurants to manage orders, reservations, menus, customer data, and POS

**Let Me React** Source Code

- Open-source contribution: helped finalize version 2 of a React scaffolding CLI that streamlines app setup by pre-configuring essential packages

## Skills & Tools

**Programming Languages:** JavaScript, TypeScript, Python, Go (Golang)
**Frontend:** React, Next.js, React Native, Tailwind CSS, shadcn/ui, Zustand, TanStack Query
**Backend:** Node.js, Express, Flask, Fiber, RESTful APIs
**Databases & BaaS:** PostgreSQL, MySQL, MongoDB, Supabase, Firebase
**Cloud & DevOps:** Docker, Linux, AWS, GCP, Vercel, Cloudflare
**Practices:** Agile/Scrum, unit & integration testing, code reviews
**Tools:** Git, GitHub, Figma, Expo

## Certifications

**Postman API Fundamentals Student Expert**, Postman, 2025

## Volunteer Work

**Google Developer Groups (GDG), Sri Lanka**
**GitHub Community Sri Lanka**
